Message from :  **SETUP**

**Results have been re-posted.**

We have decided to re-post the results because we were able to fix a problem we had with our ChampionChip timing equipment at the race.

The times were picked up by the chip mats at the finish line, however, because of an equipment problem, we were not able to extract the times from the timing box at the race site.

Because we always run a back-up timing system at our events, this back-up system came into play at the race. This also explains the delay in processing results. Those of you who race in Set Up Events triathlons, know that we normally process results immediately at the conclusion of the event. We apologize about the delay in getting the results out.

These new results are more accurate than the first results because they recorded exact times (when someone crossed the timing mat at the finish line). You may notice that times are off by a few seconds.
